PLATINUM-GROUP METALS IN OCTOBER 2005

The price of platinum, according to Platts Metals Week, slowed its climb that started in late July, which was believed to have been caused by the weakening of the U.S. dollar against major currencies. The price ended October at \$943 per troy ounce. The price of palladium slowly climbed from \$196 per troy ounce, at the beginning of the month, to \$226 per troy ounce at the end of the month. With continued concerns about the adequacy of supply, the price of rhodium reached \$3,000 per troy ounce on October 6 for the first time since 1991, after which the price started to decline and ended the month at \$2,715 per troy ounce. In contrast, the price of iridium and ruthenium remained unchanged.

On November 8, the Defense National Stockpile Center (DNSC) (2005) announced the October PGM sales results under Basic Ordering Agreement DLA-PGM-002. In October, DNSC sold 30.53 kilograms (kg) of iridium, valued at approximately \$170,860, to PGM Trading Corporation (New York, NY).

A South African mining bill that aims to encourage gold and platinum producers to help build a jewelry industry in South Africa has raised concerns from mining companies. The bill's plan was to capture profits from the value added jewelry manufacturing; however, the mining sector reportedly sees the bill as more red tape and more governmental control by forcing miners to enter the jewelry business. The South African Government appears determined to see the bill through (Bishop, 2005).

MMC Norilsk Nickel (Moscow, Russia) produced 26,100 kg of palladium and 6,200 kg of platinum during the third quarter of 2005 and forecast its production for the year to be 95,800 kg of palladium and 22,700 kg of platinum (MMC Norilsk Nickel, 2005). According to Norilsk, the worldwide demand for palladium was estimated to grow by 16,000 kg in 2006, with jewelry demand to be more than 40,000 kg of palladium (Interfax Mining & Metals Report, 2005).

Anglo Platinum Limited's (Johannesburg, South Africa) Polokwane Smelter remained on schedule to reopen in mid-December 2005. The company forecast of its production, including toll smelting done by Northam Platinum Limited (Johannesburg, South Africa), was reduced from 81,000 kg of platinum to 76,000 kg of platinum for 2005. Its other PGM production forecasts for 2005 were 41,000 kg of palladium and 10,000 kg of rhodium (Anglo Platinum Limited, 2005).

North American Palladium Ltd. (NAP) (Toronto, Ontario, Canada) announced a joint venture with Gold Fields Limited (Houghton, South Africa) to explore and develop the Arctic Platinum Project in Finland (North American Palladium Ltd., 2005a). During the third quarter of 2005, NAP produced 1,230 kg of palladium and 140 kg of platinum (North American Palladium Ltd., 2005b).
